

Web site statistics

The bar charts below show information provided from the web hosting company server, they only show the total visits, and do not identify the visitor. Some of the visits are from the search engines which crawl the site, which is why there was a peak in August 08, when I described some Pics in a manner that attracted some unusual visitors. They would have been disappointed with “amys wet pics”.

2008

2009 so far

I will update periodically when it is raining.
